NOT-WITH-STĀND'ING,* *prep.* Without hindrance or obstruction; not preventing; in spite of. *☞* In these senses *notwithstanding* has obviously the force of a preposition; yet it is, when thus used, designated by Ash as an adverb, and by the other English lexicographers, it is designated, in all the forms in which it is used, as a conjunction.—Dr. Johnson remarks upon it as follows: "This word, though, in conformity to other writers, called here a *conjunction*, is properly a *participial adjective*, as it is compounded of *not* and *withstanding*, and answers exactly to the Latin *non obstante*. It is most properly and analogically used in the ablative case absolute, with a noun; as, 'He is rich notwithstanding his loss.'"—Dr. Webster considers *notwithstanding*, in all cases, as a participle, "constituting, either with or without this or that, the case absolute or independent." It obviously has the nature of a *participle*, rather than of a *participial adjective*. In the above example, "He is rich notwithstanding his loss," *notwithstanding* may be regarded as a *preposition* governing *loss* in the objective case; or it may be construed as a *participle* in the case absolute with *loss*.

NOUGHT, (nawt) *n.* Nothing.—(*ad.* In no degree. *Fairfax.*)—To set at naught, to slight; to scorn. *☞* It has been somewhat common to write this word *naught*, in order to distinguish it from *naught*, bad; but *naught* (nothing) is the more proper orthography, and corresponds to *ought*, (any thing.) PRO-GRES'S, v. n. [*i. progressed*; *pp. progressing, progressed*.] To make progress; to advance; to proceed; to move forward. *37* The verb *progress*, with the accent on the first syllable, is found in Shakespeare; and Dr. Johnson inserted it in his Dictionary, noted as "not in use." The word is also found in Milton, used in an active sense; as, "to progress a circle;" in this sense, however, it is entirely obsolete. But the neuter verb *progress*, with the accent on the second syllable, is of modern origin or revival; and it has generally been regarded as an Americanism. It often occurs, both in conversation and in published writings, though a great part of our best writers forbear the use of it. It has of late been much used in England, and by writers of high respectability. Among the numerous English authorities that may be brought forward for the use of it, are the following: — Sir Robert Peel, O'Connell, Coleridge, Dick, Hood, Bulwer, Dickens, the British Critic, the Edinburgh Review, the Quarterly Review, the Monthly Review, the Eclectic Review, the Dublin Review, the Gentleman's Magazine, the Christian Observer, and the Penny Cyclopædia; and it is also inserted in the late English Dictionaries of Maunder, Knowles, Smart, and Reid.

In the absence of any such related verb, most speakers say prŏ-nŏn-se-ā'shun, and so avoid the double occurrence of the sound of *sh* in the same word." *Smart.* Walker says, "The very same reasons that oblige us to pronounce *partiality*, *propitiation*, *speciality*, &c., as if written *parshality*, *prophitashun*, *speshality*, &c., oblige us to pronounce *pronunciation* as if written *pronnashashun*."

This, however, is not a mere compliment, like the generality of those we pay the French; for, were we to pronounce the first syllable like *ra'il*, it might obscure and pervert the meaning. More willingly; preferably to the other; with better reason; in preference; more properly; especially.—*To have rather*, to desire in preference. *—*"Dr. Johnson tells us that this word is the comparative of *rath*, a Saxon word signifying *soon*, and that it still retains its original signification: as we may say, 'I would sooner do a thing,' with as much propriety as 'I would rather do it.' Some very respectable speakers pronounce this word with the first syllable like that in *ra-cen*; and Mr. Nares has adopted this pronunciation. Dr. Ash and Bailey seem to be of the same opinion; but all the other orthoepists, from whom we can certainly know the quantity of the vowel, as Mr. Sheridan, Mr. Elphinstone, Mr. Scott, Dr. Kenrick, W. Johnston, Mr. Perry, Buchanan, and Entick, make it short. There is a pronunciation of this, and some few other words, which may not improperly be called diminutive. Thus, in familiar conversation, when we wish to express *very little*, we sometimes lengthen the vowel, and pronounce the word as if written *little*. In the same manner, when *rather* signifies *just preferable*, we lengthen the first vowel, and pronounce it long and slender, as if written *rather*; and this, perhaps, may be the reason that the long, slender sound of the vowel has so much obtained; for usage seems to be clearly on the side of the other pronunciation, and analogy requires it, as this word is but the old comparative of the word *rath*, soon." *Walker.*

†"Dr. Johnson, Dr. Ash, Dr. Kenrick, Mr. Barclay, Mr. Nares, Mr. Scott, Mr. Fry, and Entick, caught this word on the second syllable; Mr. Sheridan and Bailey on the last; and Fenning, only, on the first. But, notwithstanding so many authorities are against me, I am much deceived if the analogy of pronunciation be not decidedly in favor of that accentuation which I have given. We have but few instances in the language where we receive a word from the Latin, by dropping a syllable, that we do not remove the accent higher than the original. Thus *recondite*, derived from *reconditus*, may with as much propriety remove the accent from the long penultimate, as *carbuncle* from *carbunculus*, *calumny* from *calumnia*, *detriment* from *detrimentum*, *innocency* from *innocentia*, *controversy* from *controversia*, and a thousand others. The word *recondite* must certainly follow the fortunes of the present word; and we find those orthoëpists, who have the word, accent it as they do *recondite*. Mr. Sheridan on the last syllable, but Mr. Fenning, inconsistently, on the second."

Spenser and Milton place the accent upon the second syllable of this word; and, as Mr. Nares observes, Dr. Johnson has, on the authority of these authors, adopted this accentuation. 'But this,' says Mr. Nares, 'is irregular; for every monosyllabic termination, added to a word accented on the antepenult, throws the accent to the fourth syllable from the end.' With great respect for Mr. Nares's opinion on this subject, I should think a much easier and more general rule might be laid down for all words of this kind, which is, that those words which take the Saxon terminations after them, as *er*, *less*, *ness*, *lessness*, *ly*, &c., preserve the accent of the radical word; therefore this and the following words ought to have the same accent as *remedy*, from which they are formed." *Walker*.

[**REVENUE**, n. This word seems as nearly balanced between that accent on the first and second syllable as possible; but as it is of the same form and origin as *revenue* and *retinue*, it ought to follow the same fortune. *Retinue* seems to have been long inclining to accent the first syllable, and *revenue* has decidedly done so, since Dr. Watts observed that it was sometimes accented on the second; and, by this retrocession of accent, as it may be called, we may easily foresee that these three words will uniformly yield to the antepenultimate accent, the favorite accent of our language, conformably to the general rule, which accents simples of three syllables upon the first. Dr. Johnson, Mr. Nares, and Bailey, are for the accent on the second syllable; but Dr. Ash, Dr. Kenrick, Buchanan, W. Johnston, Perry, Barclay, Fenning, and Entick, accent the first. Mr. Sheridan gives both, but places the antepenultimate accent first." *Walker*. This "noted vulgarity" has been countenanced, for more than "a hundred years," by the English dictionaries; and it is sanctioned by the most eminent English lexicographers. Bailey defines the verb to *ride*, "to go on horseback, in a coach, wagon, &c.;" Johnson, "to travel on horseback; to travel in a vehicle;" Richardson, "to convey or carry on a horse, or other animal, or in any sort of carriage; to sit upon such an animal, or in such a carriage, whether the motion be slow or fast;" and Todd defines the noun *ride*, "an excursion in a vehicle or on horseback; as, 'to take a ride.' There is some diversity among our orthoepists about the *l* in this word and its verb. Mr. Sheridan marks it to be pronounced; Mr. Smith, W. Johnston, and Barclay, make it mute; Mr. Scott and Mr. Perry give it both ways. Mr. Nares says it is mute in the noun, but sounded in the verb. The mute *l* is certainly countenanced in this word by *calve* and *halve*; but, as they are very irregular, and are the only words where the *l* is silent in this situation, for *valve*, *dece*, *sove*, &c., have the *l* pronounced,) and as this word is of Latin original, the *l* ought certainly to be preserved in both words; for, to have the same word sounded differently to signify different things, is a defect in language that ought, as much as possible, to be avoided." *Walker.*

In encyclopædias and dictionaries of the arts and sciences, the orthography generally used is *sceptic*.

Walker, in speaking of the orthography and pronunciation of this word, says, "Dr. Johnson has not only given his approbation to the sound of *k*, but has, contrary to general practice, spelt the word *sceptic*. It is not my intention to cross the general current of polite and classical pronunciation, which is, I know, that of sounding the *c* like *k*; my objection is only to writing it with the *k*; and in this I think I am supported by the best authorities since the publication of Johnson's Dictionary."

In a notice of Dr. Johnson's Dictionary, in the Monthly Review, in 1755, soon after its first publication, the following remark is found, in relation to this word: "*Sceptic*, he insists, ought to be written *sceptic*, but without producing any authority in favor of that mode of spelling." In all the instances, six in number, adduced by Johnson to illustrate the use of the words *sceptic*, *sceptical*, and *scepticism*, the orthography of *sc*, and not *sk*, is used; the same is the fact with respect to all the instances, nine in number, adduced by Richardson in his Dictionary. The orthography of *sceptic*, *sceptical*, *scepticism*, continues to be the prevailing and best usage; *sc* being pronounced hard like *k* in these words, as in the word *scirrhus*.

If we follow the first, we ought to pronounce the word *skédula*; if the last, *shédula*; but entirely sinking the *sh* in *skédula* seems to be the prevailing mode, and too firmly fixed by custom to be altered in favor of either of its original words. Dr. Kenrick, Mr. Perry, and Buchanan, pronounce it *skédula*; but Mr. Elphinstone, Mr. Sheridan, Mr. Scott, Mr. Nares, Barclay, Fenning, and Shaw, *sêdula*; though, if we may believe Dr. Jones, it was pronounced *skedule* in Queen Anne's time." *Walker.*

Wh.*] *n.* [*schisma*, *Fr.*; *σχίσμα*, *Gr.*] A separation from the true church; a division or separation, particularly among those who profess the same religion; a division; separation. "The common pronunciation of this word is contrary to every rule for pronouncing words from the learned languages, and ought to be altered. *Ch.* in English words, coming from Greek words with *chi*, ought always to be pronounced like *k*; and I believe the word in question is almost the only exception throughout the language. However strange, therefore, *shizm* may sound, it is the only true and analogical pronunciation; and we might as well pronounce *schisme* some, as *schism* *shizm*, there being exactly the same reason for both. But, when once a false pronunciation is fixed, as this is, it requires some daring spirit to begin the reformation; but, when once begun, as it has (what seldom happens) truth, novelty, and the appearance of Greek erudition, on its side, there is no doubt of its success. Whatever, therefore, may be the fate of its pronunciation, it ought still to retain its spelling. This must be *isid* sacred, or the whole language will be metamorphosed; for the very same rea-

son that induced Dr. Johnson to spell *sceptick* *skeptick*, ought to have made him spell *schism* *sizm*, and *schedule* *sedula*. All our orthoepists pronounce the word as I have marked it." *Walker*.

SÉRG'ÉANT, (sérj'ent) (sérj'ent, S. W. P. J. E. F. Ja. Wb.; sérj'ent or sérj'ent, K. J.) n. [*sergent*, Fr.; *sergent*, It.] An officer; a non-commissioned officer of the army.—A *sergeant*, or *sergeant-at-law*, (England) is the highest degree of common law, through which all must proceed before attaining the dignity of judge.—A *sergeant-at-arms*, an officer attending on the person of a king; an officer of a court, or of a legislature, whose duty it is to attend offenders, &c.

—This word is often written *serjeant*; and this orthography is found in encyclopedias, many works on law, and other publications; though the orthography in most of the English dictionaries is *sergeant*.

—There is a remarkable exception to the common sound of the letter *s* in the words *clerk*, *sergeant*, and a few others, where we find the *s* pronounced like the *s* in *dark* and *margia*. But this exception, I imagine, was, till within these few years, the general rule of sounding this letter before *r*, followed by another consonant. Thirty years ago, every one pronounced the first syllable of *merchant* like the monosyllable *march*, and as it was originally written, *marchant*. *Service* and *servant* are still heard, among the lower orders of speakers, as if written *service* and *servant*; and even among the better sort, we sometimes have the salutation, 'Sir, your *servant*;' though this pronunciation of the word singly would be looked upon as a mark of the lowest vulgarity. The proper names *Derby* and *Berkley* still retain the old sound; but even these, in polite usage, are getting into the common sound, nearly as if written *Derby* and *Burkley*. As this modern pronunciation of the *s* has a tendency to simplify the language by lessening the number of exceptions, it ought certainly to be indulged. *Walker*.

"The letters *er* are irregularly sounded *er* in *clerk* and *sergeant*, and formerly, but not now, in *merchant*, *Derby*, and several other words." *Smart*.

In the United States, the letters *er* are, by good speakers, regularly sounded, as in *ser*, in the words *merchant*, *servant*, *Derby*, *Berkley*, &c. The regular pronunciation of *clerk* (clérk) is also a very common, if not the prevailing, mode. Many give the same sound to *s* in *sergeant*. See *CLARK*, and *MERCHANT*.

"The corrupt pronunciation of this word is become universal, though in Junius's time it should seem to have been confined to London; for, under the word *shore*, he says, 'Common shore, Londoners use a corrupted diction, the common sewer.' Johnson has given us no etymology of this word; but Skinner tells us, 'Non infeliciter *Conventus* declinat a verbo *sewer*, dictamque putat quasi *isewer*, abjecta initiali syllaba.' Nothing can be more natural than this derivation; the *s* going into *sh* before *n*, preceded by the accent, is agreeable to analogy, and the *n* in this case, being pronounced like *ew*, might easily draw the word into the common orthography, *sewer*; while the sound of *sh* was preserved, and the *ew*, as in *shew*, *strew*, and *sew*, might soon slide into *e*, and thus produce the present anomaly." *Walker*.

SIRLOIN, (*sir'loin*, *J. E. F. Sm. R. Wb.*: *sir-loin*, *Ja. Russ.*) *n.* The loin of beef, or a piece of beef covering either kidney.—A *heron* of beef, now an obsolete joint, consisted of two sirloins undivided. *W. Ency.*—Johnson, in his definition of *ox*, says it is "a title given to the loin of beef, which one of our kings knighted in a fit of good humor," or, as another phrases it, "in one of his merry moods."—In this account of the origin of *sirloin*, Johnson has been generally followed by subsequent English lexicographers, who have spoken of its etymology. The king referred to, according to some, was Charles II.; but according to a greater number, James I. The following account is given by Dean Swift, in his "Polite Conversation":—"But pray why is it called a *sirloin*?—Why, you must know that our king, James I., who loved good

eating, being invited to dinner by one of his nobles, and seeing a large loin of beef at his table, he drew out his sword, and in a frolic knighted it." Whether this was related by Swift in a serious or "merry mood," may be doubted; as it may well be doubted whether this is a correct account of the origin of the word.

It is not found in any English dictionary previous to that of Johnson, with the orthography of *sirloin*; but the earlier orthography was *surlain*. Bailey's Dictionary has *surlain* of beef, corresponding to the French *surlonge de bœuf*, the obvious or probable etymology. *Surlain* is also given by Ainsworth; and the word occurs repeatedly in Cotgrave's Dictionary, first published in 1611, with the orthography of *surlions* and *surlonges*.
